

RM 851

Disinfecting agent W

PRODUCT INFORMATION

RM 851 is an aqueous solution of a **germicide** based on hydrogen peroxide and special biocides suitable for the application in washing plants with wash water recycling systems.

If handled properly RM 851 minimizes the biological fouling processes in the wash water recycling system and the occurrence of bad odours and sludge formation.

For the first intensive treatment recommend a dosage of 250 to 500 ml/m³ to the wash water is recommended. With everyday use approx. 20 ml/m³ are sufficient. The corresponding exact dosage depends on the load of the wash water.

Instructions for application:

Type of Plant	Predilution (RM + Water)	Application strength based on original concentrate
Wash water recycling system	undiluted	5 ml to 500 ml per m ³ depending on the load of the wash water

Temperature: cold

Do not predilute with water!

Do not mix with other detergents or chemicals!

Do only use product in original containers!

Store dry, cool and in containers impervious to light!

pH-value concentrate: approx. 3

Further Information:

Material Safety Data Sheet

Attention:

Xn Harmful; R22 Harmful if swallowed.; R 37/38 Irritating to respiratory system and skin. R 41 Risk of serious damage to eyes.

S 26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

S 37/39 Wear suitable gloves and eye/face protection.

S 60 This material and its container must be disposed of as hazardous waste.

Use biocides safely. Always read the label and product information before use!
